Austin, TX 78745 | (210) 415-6997 | www.linkedin.com/in/peyton-webster96 | peyton.webster96@gmail.com

Professional Summary

Healthcare implementation and consulting professional with 6+ years across health systems, healthcare technology, and healthcare consulting, including 3+ years delivering Oracle Health/Cerner implementations. Lead customer-facing EHR deployments, requirements, integration validation, and go-live readiness for 30+ hospital sites and a 3,000+ user health-system environment. Healthcare consulting experience at GLG strengthens client scoping, executive communication, and delivery.

Core Competencies

- **Customer Implementation:** End-to-end deployment | Project plans, timelines, and milestones | Customer-facing stakeholder management | Risk, issue, and dependency tracking | Status reporting
- **Clinical & Technical:** EHR workflows | Oracle Health / Cerner Millennium | HL7 interface validation | Integration and data-migration testing | UAT | Go-live and stabilization
- **Customer & Delivery Tools:** Jira | ALM | Smartsheet | ServiceNow | Power BI | Tableau | Advanced Excel

Work Experience

Clinical Informatics Specialist | Ascension - Austin, TX

Feb. '24 - Present

- Serve as the strategic informatics liaison between clinical service lines and IT for a 3,000+ user environment, translating workflow gaps, performance needs, and regulatory constraints into prioritized technology demand.
- Lead demand intake and requirements definition for clinical application changes, shaping ambiguous requests into clear problem statements, scope, outcomes, and dependencies for governance and delivery planning.
- Design configuration-first, human-centered workflows and adoption plans that reduce unwarranted variation and downtime during care transitions while incorporating HIPAA, privacy, security, vendor data-handling, and patient-safety requirements.
- Direct EHR testing, release readiness, and post-go-live support; analyze adoption and service-performance trends (incidents, requests, and SLAs) to identify root causes and coordinate optimization.
- Supported multiple clinical-system conversions and go-lives, including a Medhost-to-Cerner transition, through cutover preparation, back-charting coordination, frontline troubleshooting, and proactive escalation of missing clinical information.
- Pioneered ClinTranslate AI, a GenAI pilot that accelerated test-plan development and clinical documentation; defined success criteria and earned Runner-Up in Ascension's Gemini AI Showcase.

Healthcare Consultant | Oracle Health (Cerner) - Austin, TX

Oct. '22 - Feb. '24

- Led technology-delivery and testing workstreams across 30+ hospital sites, partnering with executives and frontline stakeholders to advance Oracle Health Millennium implementations.
- Translated clinical and engineering needs into workflow-optimization and solution-design decisions, resolving delivery bottlenecks to protect go-live readiness and end-user adoption.
- Orchestrated enterprise integrated-testing events and HL7 interface validation, escalating risks and mitigation plans to safeguard clinical operations and technical reliability.
- Maintained requirements traceability in Jira and ALM, achieving a 98%+ quality-compliance rate while meeting healthcare IT standards.

Senior Client Solutions Associate, Healthcare Consulting | GLG — Austin, TX | Apr 2021–Oct 2022

- Advised global healthcare technology clients, including GE Healthcare and Siemens, on IT operations, clinical workflows, privacy, and regulatory challenges to inform strategic and investment decisions.
- Translated complex client questions and clinical needs into scoped research requirements; coordinated expert resources, internal teams, and executive-ready deliverables for time-sensitive engagements.
- Standardized delivery workflows, contributing to a 10% improvement in team productivity.

Additional Experience and Leadership

Laboratory Manager | UT Health San Antonio — San Antonio, TX | May 2020–Apr 2021

Selected Speaker | Austin Tech Week AI Track — October 2026
